

VC48DG

# Super-Fast 2 Port Car Charger

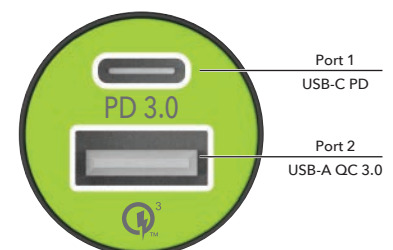

When you're miles from home and your phone battery is hitting single digits, this super-fast car charger will be an invaluable addition to your vehicle. Quickly and safely charge two devices while on-the-go. Such as Laptops and Chromebooks up to 30W, mobile phones and other USB powered devices. Perfect for powering an in car Qi wireless charging pad.

- Fully compatible with all USB powered devices, up to 50% faster than a standard 5W charger
- SUPER-FAST for Samsung + all QC 3.0 compatible Smartphones and Qi Wireless Chargers
- Backwards compatible with QC 1.0 and QC 2.0 devices
- Energy efficient, intelligent 'controlled-charging' adjusts to suit each device
- Full protection for Voltage, Current, Short Circuit and Temperature

## Specifications

Code	VC48DG
Input	DC 12 - 24V
Number of Ports	2
Port 1 / USB-C PD	up to 30W
Port 2 / USB-A QC 3.0	up to 18W
Max Combined Output	48W
Suitable for	iPads, Tablets and Laptops up to 30W. Provides up to a super-fast 18W for mobile phones, plus compatible with all USB powered devices
Dimensions (WxHxD)	2.4 x 2.4 x 6.15 cm
Weight	20g
EAN	5014117970496

## What is Power Delivery?

USB Power Delivery (PD) is a fast charging specification using USB Type-C and is incorporated into a wide variety of devices including smartphones, tablets, laptops and more.

This means the same charger can be used to charge your laptop, your phone and other devices. The days of having to carry multiple chargers are over.

PD can charge compatible smartphones from 0 to 50% in just 30 minutes, or up to 70% faster than with a standard 5W charger.

PD is also smart, it detects how much power a device is able to receive, providing the optimal charge and no more, ensuring devices are safe from overheating.

PD requires a USB Type-C cable, or a USB Type-C to Lightning cable for Apple devices.

All Apple iPhones (8 and newer), plus Samsung Galaxy A8, S8 and Note 7 onwards, are PD compatible along with many Smartphones from other brands.

## What is QuickCharge 3.0?

QUALCOMM® Quick Charge™ is a fast charging technology incorporated into many mobile devices such as those made by Samsung and Sony.

When paired with a high speed cable, a Quick Charge 3.0 charger can charge compatible devices from 0 to 80% in just 35 minutes, or up to 4x faster than with a standard 5W charger.

More information and a full list of compatible devices is available on the QUALCOMM® website, [qualcomm.com/documents/quick-charge-device-list](http://qualcomm.com/documents/quick-charge-device-list)

To achieve the maximum output and the fastest charge possible from our Wireless Qi Chargers, we recommend pairing with a QC 3.0 wall or car charger.
