

VH48DW

Super-Fast 2 Port Wall Charger

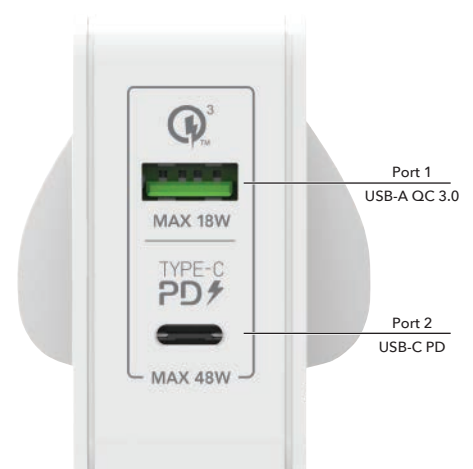

Charge two devices at the same time, quickly and safely. Offering up to 30W for devices such as Laptops and Chromebooks, plus a super fast 18W for both PD and QC 3.0 compatible smartphones.

- Compatible with all USB powered devices, up to 50% faster than a standard 5W phone charger
- Charges Laptops, Chromebooks and iPad Pro up to 48W
- *SUPER-FAST* for iPad, iPhone, Samsung and all PD and QC 3.0 Smartphones
- Backwards compatible with QC 1.0 and QC 2.0 devices
- QC 3.0 port, perfect for powering Qi wireless charging pads
- Energy efficient, intelligent '*controlled-charging*' adjusts to suit each device
- Full Voltage, Current, Short Circuit and Temperature protection

Specifications

Code	VH48DW
Input	100 - 240V~50/60Hz 1.5A Max
Number of Ports	2
Port 1 / USB-A QC 3.0	up to 18W
Port 2 / USB-C PD	up to 48W or 30W if port 1 is in use
Max Combined Output	48W
Suitable for	Laptops and Chromebooks up to 48W, all iPad models, Nintendo Switch, iPhone, Samsung, all other major brand smartphones and USB devices
Dimensions (WxHxD)	4.9 x 6 x 9.7 cm
Weight	150g
EAN	5014117970458

What is Power Delivery?

USB Power Delivery (PD) is a fast charging specification using USB Type-C and is incorporated into a wide variety of devices including smartphones, tablets, laptops and more.

This means the same charger can be used to charge your laptop, your phone and other devices. The days of having to carry multiple chargers are over.

PD can charge compatible smartphones from 0 to 50% in just 30 minutes, or up to 70% faster than with a standard 5W charger.

PD is also smart, it detects how much power a device is able to receive, providing the optimal charge and no more, ensuring devices are safe from overheating.

PD requires a USB Type-C cable, or a USB Type-C to Lightning cable for Apple devices.

All Apple iPhones (8 and newer), plus Samsung Galaxy A8, S8 and Note 7 onwards, are PD compatible along with many Smartphones from other brands.

What is QuickCharge 3.0?

QUALCOMM® Quick Charge™ is a fast charging technology incorporated into many mobile devices such as those made by Samsung and Sony.

When paired with a high speed cable, a Quick Charge 3.0 charger can charge compatible devices from 0 to 80% in just 35 minutes, or up to 4x faster than with a standard 5W charger.

More information and a full list of compatible devices is available on the QUALCOMM® website, qualcomm.com/documents/quick-charge-device-list

To achieve the maximum output and the fastest charge possible from our Wireless Qi Chargers, we recommend pairing with a QC 3.0 wall or car charger.
